ReNew is a leading decarbonisation solutions company listed on Nasdaq (Nasdaq: RNW, RNWWW). ReNew's clean energy portfolio of ~20.5 GW (including 1.7 GW/6.2 GWh of BESS) on a gross basis as of June 30, 2026, is one of the largest globally. In addition to being a major independent power producer in India, ReNew provides end-to-end solutions in a just and inclusive manner in the areas of clean energy, value-added energy offerings through digitalisation, storage, and carbon markets that are increasingly integral to addressing climate change. ReNew has 6.4 GW of solar module and 2.5 GW of solar cell manufacturing capacities. Additionally, the company is expanding its manufacturing capabilities through a 4 GW TopCon solar cell facility and a 6.5 GW ingot-wafer manufacturing facility.

ReNew consistently ranks among the top performers in ESG ratings across renewables and other industries. In FY26, ReNew achieved a score of 90.41/100 (A grade) in the LSEG ESG Ratings, ranking #2 globally in the Electric Utilities & IPP sector. This distinction underscores its data-driven, transparent ESG leadership and commitment to sustainability at scale.

ReNew's MSCI rating is "AAA", placing the company among the Industry Leaders category. ReNew achieved an "A" rating in the CDP Climate Change assessment for FY 2025-26, placing it among the top 5% globally. An integral part of the global energy system, ReNew's projects have helped generate more than 130,000 jobs, both directly and indirectly. The company's net-zero target by 2040 has been validated by the Science Based Targets initiative (SBTi).

ReNew generated 24.7 billion units (kWh) of clean energy during FY 2025-26, enough to power 21.2 million Indian households annually, and helped avoid 20.8 million tonnes of CO_2 emissions during FY 2025-26. The company has twice been recognised as a Global Lighthouse by the World Economic Forum for advancing Fourth Industrial Revolution technologies at scale and achieving impact on the ground.

As a market leader, ReNew has been leveraging digital technologies to accelerate the energy transition and address the unique requirements of the B2B segment. ReNew is backed by a pool of high-profile global investors. The Canada Pension Plan Investment Board is the majority shareholder in the company. Other key institutional investors include the Abu Dhabi Investment Authority (ADIA) and Japanese energy producer JERA.

As a responsible corporate citizen, ReNew works closely with communities to create a positive impact at the grassroots level. ReNew has committed to being a net-zero company by 2040, and its social initiatives have cumulatively impacted 1.95+ million lives as of FY 2025-26 across 14 states, 385 villages, and 878 locations.

Over the years, ReNew has received major industry awards. In 2026, it was featured in TIME magazine's "World's Top GreenTech Companies." The company has also been recognised by Fortune magazine (four times, in 2026, 2025, 2024, and 2021) in its "Change the World" list as a leader in the clean energy transition.

ReNew also received the Clean Energy Transition Award at the 2020 Reuters Responsible Business Awards and was identified as one of India's best workplaces in the Oil, Gas, and Energy category by Best Places to Work in 2021. ReNew was featured in the inaugural "Top 15 Climate Tech Companies to Watch" list by the MIT Technology Review. In 2023, ReNew was the only clean energy company from the Global South to receive the Sustainable Market Initiative's Terra Carta Seal. In December of that year, the company was presented with the "Energy Transition Changemaker" award by the COP28 Presidency for developing and deploying the country's first round-the-clock power project.
